PROFESSIONAL SUMMARY

Results-driven Data Science graduate student (B.Tech AI & Data Science, 2026) with hands-on internship experience in data analytics, machine learning, and Python-based data pipelines. Certified in AWS Generative AI with proven skills in EDA, data preprocessing, and visualization. Passionate about building intelligent, data-driven solutions and eager to grow as a Data Scientist in a forward-thinking organization.

WORK EXPERIENCE

Data Analyst Intern — CODTECH IT Solutions

Jan 2024 – Mar 2024

- Executed end-to-end data analytics projects: cleaning, preprocessing, and transforming datasets using Python (Pandas) and Excel, reducing data errors by ~30%
- Conducted exploratory data analysis (EDA) to uncover key patterns, trends, and actionable insights from large datasets
- Developed data visualization reports using Matplotlib and charts to support management decision-making
- Resolved data quality issues — missing values, duplicates, and inconsistencies — improving overall dataset reliability

Data Analyst Intern — MindfulAI Technologies

Jun 2024 – Aug 2024

- Performed dataset profiling, feature exploration, and preprocessing pipelines using Python (Pandas, NumPy)
- Built interactive dashboards and visualizations to deliver clear data insights for non-technical stakeholders
- Assisted in data preparation and feature engineering for machine learning model development
- Collaborated in an Agile team environment, consistently delivering analytical tasks within sprint deadlines

PROJECTS

Customer Churn Prediction | Python, Scikit-learn, Pandas, Matplotlib

- Built a supervised ML model (Random Forest + Logistic Regression) to predict customer churn with 87% accuracy
- Performed feature engineering and SMOTE oversampling to handle class imbalance in the dataset
- Visualized feature importance and ROC curves to interpret model performance

Sales Data Analysis & Dashboard | Python, Pandas, Power BI / Matplotlib

- Analyzed 50K+ rows of retail sales data to identify top-performing products and seasonal trends
- Automated data cleaning pipeline reducing manual preprocessing time by 60%
- Created an interactive dashboard presenting KPIs for business stakeholders

Sentiment Analysis on Product Reviews | Python, NLP, NLTK, Scikit-learn

- Developed a text classification model using TF-IDF and Naive Bayes to classify customer sentiment(positive/negative/neutral)
- Preprocessed raw review text using tokenization, stop-word removal, and lemmatization
- Achieved 83% classification accuracy on a test set of 10,000 reviews

AWS Generative AI Mini-Project | AWS Bedrock, Python, Boto3

- Designed and deployed a generative AI workflow using AWS Bedrock as part of AWS Generative AI certification
- Integrated foundation models for text summarization and Q&A; tasks using Python SDK

Traffic Congestion Analysis and Intelligent Control System Using Machine Learning | Python, Scikit-learn, OpenCV, Pandas, Matplotlib

- Developed an ML-based intelligent traffic control system to analyze congestion patterns and dynamically optimize signal timings across intersections
- Performed data collection, preprocessing, and feature engineering on real-world traffic datasets including vehicle count, speed, and time-of-day attributes
- Trained and evaluated classification and regression models (Random Forest, XG Boost) to predict congestion levels with over 95% accuracy
- Designed a rule-based adaptive signal control algorithm that reduced simulated average wait times by ~25%compared to fixed-cycle signals
- Visualized traffic flow patterns and congestion heatmaps using Matplotlib and Seaborn for insights and reporting

EDUCATION

Nov 2022 – May 2026

B.Tech — Artificial Intelligence and Data Science

Grace College of Engineering, Mullakaddu, Thoothukudi

CERTIFICATIONS

- AWS Generative AI — Amazon Web Services (AWS)
- Data Analytics Fundamentals — (Python, SQL, Visualization)

TECHNICAL SKILLS

Languages: Python, SQL

Libraries / Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK

Visualization: Power BI, Matplotlib, Seaborn, Excel Charts

Cloud: AWS (Bedrock, S3, Lambda basics)

Concepts: EDA, Data Preprocessing, Feature Engineering, ML Modelling, Statistics

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration, Time Management

ADDITIONAL INFORMATION

Languages: English, Tamil **Availability:** Immediate / Open to Work **Location:** Thoothukudi, Tamil Nadu
